

\textbf{DiffVax}^{++} : One Confirmed Contribution and Three Surprising Discoveries

(a) Patch-Based High-Res Inference
More overlap $\rightarrow$ stronger ($\times 1.60$ baseline)

(b) Cross-Architecture Transfer
SD1.5-only transfers to FLUX & SD3.5 (no retraining)

(c) JPEG Paradox on FLUX.1-schnell
JPEG q=75 increases sd15_only EDR by 50%
